Summary

- MSc student in Artificial Intelligence Engineering at METU ImageLab, supervised by Emre Akbas. My research is on human pose and motion, and on making computer vision work for traditional folk dances: robust pose estimation, motion data, and the datasets that make both possible.

Education

BSc **Hacettepe University**, Artificial Intelligence Engineering — Ankara, Turkey
Sept 2020 – Feb 2025

- GPA: 3.17 / 4.00
- Machine Learning, Deep Learning, Image Processing, Computer Vision, Bioinformatics

Experience

Inzva, Guide & Participant — Istanbul, Turkey & Online
Aug 2023 – present
3 years 4 months

- Observer in AI Projects #10, lightly guiding a team through the program
- Volunteer in Vision Cohort 2026, helping with logistics
- Proposed and led a pose estimation and dataset creation project for folk dances in AI Projects #9
- Guide for the Applied AI and Deep Learning study groups, lecturing on Video Understanding, Virtual Humans and CNNs
- Improved the DeTraffic project in AI Projects #8 with Q-Networks using Kolmogorov-Arnold Networks (KANs) for traffic control
- Completed the Google Developers ML Bootcamp (TensorFlow) and competed in Kaggle challenges

Hacettepe University, Biological Data Science Laboratory, Researcher — Ankara, Turkey
July 2022 – Oct 2025
3 years 4 months

- Developed, maintained and refactored pypath (Python, GraphQL, REST API), adding dataset modules that cut data preprocessing time for bioinformatics researchers
- Developed a GraphQL API for the CROssBAR knowledge graph database
- Worked on the LLM integration of CROssBAR
- Built the server infrastructure of CROssBAR

Samsung Innovation Campus, Guide & Participant — Ankara, Turkey & Online
Aug 2023 – Jan 2025
1 year 6 months

- Technical Guide for two consecutive terms (Jun. 2024, Jan. 2025), lecturing on model deployment strategies
- Co-developed DeTraffic, an AI-driven traffic management system aligned with UN Sustainable Development Goals 3, 11, 12 and 13
- Completed training on the AI development lifecycle, sustainable development and large-scale AI project methodology

Technical Skills

Interests: Virtual Humans, Computer Vision, Deep Learning, Machine Learning, Reinforcement Learning

AI: PyTorch, PyTorch3D, PyTorch Geometric, TensorFlow

Programming: Python, C, Java

Other: Linux system administration, Bash, Astro

Languages: Turkish (native), English (C1; IELTS 8/9, TOEFL 110/120)
